`SUPER SAFE GLOCK`

this attachment is designed to add a manual safety on the external backplate of a glock to allow safer handling of the weapon system, THIS IS NOT AN AUTO SEAR OR A FORCED RESET TRIGGER this simply blocks the crucifix from contacting the disconnecter and prevents live fire until disengaged.

Nozzle temp 220

Bed temp 60

Wall count 20

Infill 100

Supports: supports needed

Orientation: files are not pre oriented

cooling: fan on 50% after first 3 layers to prevent warping

bed adhesion: pva gluestick or hairspray recommended

all other print settings should be left default or as works best with your setup

installation is as simple as replacing a glock backplate and you should perform a function check to guarantee proper safety measures are met
