

Build Instructions - LR-308 INFO.txt

Generated by Spread the Signal

Hello,

Thank You for downloading the LR-308 Super (and Basic) Lower V2.6!
See the README for generic info and print settings.
You will need a #28 0.5 Inch wide hose clamp for this lower.
Due to the length of the lower, you may need to print diagonally on the bed.

Improvements in V2.6:

Stronger right side.

New buffer threads for better printing.

Updated mag well to fix feeding issues.

New support.

Trigger area more blended.

Hammer Pin adjusted to help prevent binary fire.

Bushings holes tightened to help prevent binary fire.

Safety Hole extended through right side for compatibility reasons.

And a lot more!
